

Indiana Water Testing Labs

The FSMA Produce Safety Rule may require your farm to have your agricultural water tested for generic E. coli by a third-party laboratory. Pre-harvest agricultural water that contacts the harvestable portion of the produce must be tested using quantitative methods. Water applied to the produce post-harvest can be tested for E. coli using presence/absence methods. For microbial quality criteria, see [§112.44](#) of the Produce Safety Rule. The FDA recognizes 9 quantitative testing methods and 7 presence/absence water testing methods for generic E. coli. The map to the right shows the locations of accredited third-party labs that perform E. coli testing that meets the FDA requirements. A list of the labs and their contact information can be found on the following pages of this document.

	Lab that tests water using presence/absence methods only
	Lab that tests water using both quantitative and presence/absence methods

Indiana Water Testing Labs

All labs listed on the following pages can perform water testing for E. coli within the FDA requirements outlined in the FDA Fact Sheet “Equivalent Testing Methodology for Agricultural Water”. Some labs may only perform presence/absence E. coli testing. After you select your water testing lab, please contact the lab for specific sampling instructions and costing information.

Lab	County	Street Address	City, State, Zip	Phone Number	Presence, Absence	Quantification
CF Environmental, LLC	Allen	3711 Vanguard Dr. Suite D	Fort Wayne, IN 46809	260-449-9299	X	X
Element Laboratories of Fort Wayne	Allen	328 Ley Rd Suite 100	Fort Wayne, IN 46825	260-471-7000	X	X
Columbus City Utilities, Environmental Laboratory	Bartholemew	1111 McClure Rd.	Columbus, IN 47202	812-376-2400	X	
Element Laboratories of Columbus	Bartholemew	8800 N US 31	Columbus, IN 47201	812-375-0531	X	X
Twin Rivers Medical Laboratory, Inc.	Cass	902 West Broadway	Logansport, IN 46947	574-739-0004	X	X
